

Next Gen MXR 7380

Powered by Bosch® for best performance

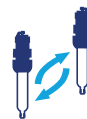

New product, new solutions

Enhance durability & service life

Patented continuous wave laser welded electrodes enhance durability and service life.

Core design features taken over from Bosch® 7305 / 7308 for maximum reliability and increased service life.

Drop-in replacement

Drop-in replacement for 7305/7308, 18GZ5-77-2, GL3-5. No adjustments needed.

High reliability

Best in class ceramic with high di-electric strength
High quality composite ceramic resistor from 7305/7308.

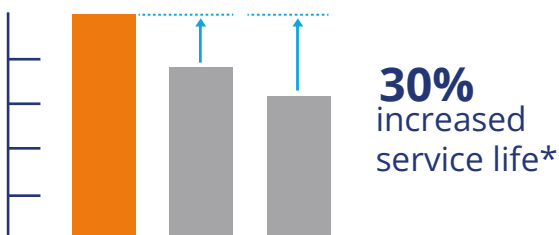

New design

High performance triple Ir. industrial spark plug.

Extended service life

Up to 30% Better than competitors

* Results based on field experiences. 30% increased service life has been established in some instances.
Note: lifetime depends on operation conditions including but not limited to fuel, duty cycle/load, ignition system, and environmental conditions.

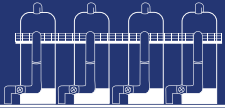

MXR 7380 spark plug is co-developed and produced under license with Robert Bosch GmbH, Germany

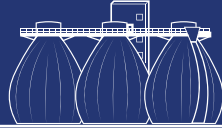

H2-ready spark plug

Completely new foot design decreases heat range and makes plug H2-ready.

For all gas-markets

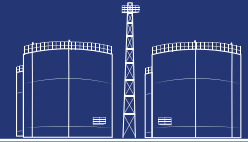

NATURAL-GAS

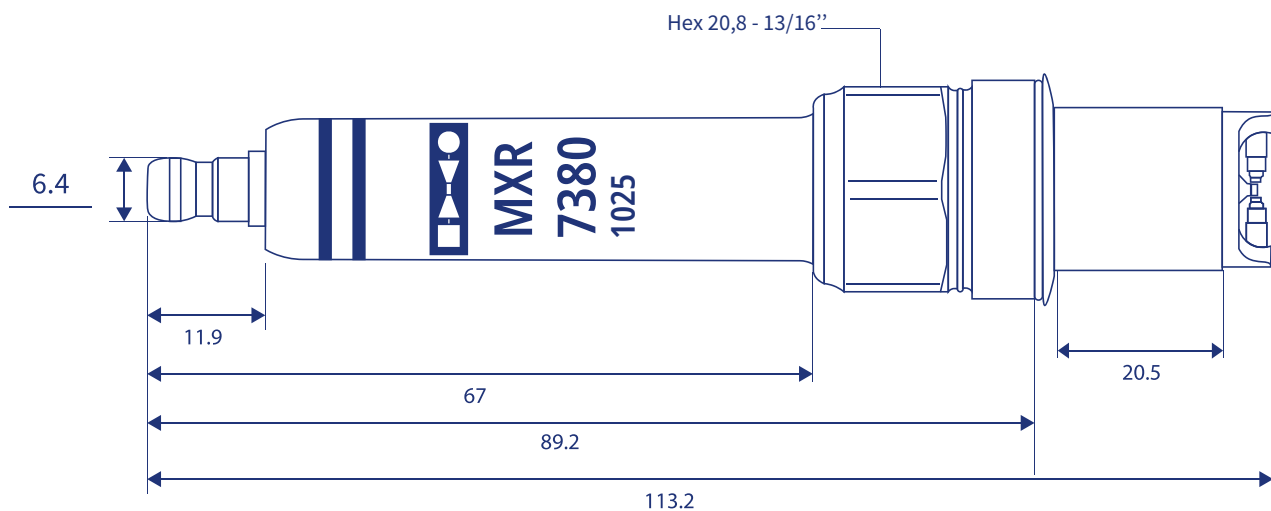

SEWAGE-GAS

BIO-GAS

H2-ready

Applicable for various engines like;

- MAN® E3262 and E3268
- Deutz® / MWM® TBG616 and TBG620
- Cummins® QSV91 and QSK60
- Guascor® FGLD series and SFGLD series
- CAT® 3500 A/B versions and 3600 series
- Perkins® 4000 series- TESI
- Waukesha® L7044GSI and more...
